

## EVENT WRAP-UP

# Multi-Domain Weapons Technology Pt 1:

## Terminal Effects

3 MAY 2023  
Virtual

## Event Description

Doolittle Institute's Technical Showcase event series featured Dr. Anne Marie Petrock, the Senior Scientist for Warheads Technology at Army Combat Capabilities Development Command Armaments Center, as its first DoD guest collaborator. In a two-part series on Multi-Domain Weapons Technologies, Dr. Petrock focused on Terminal Effects in part 1. DI received 5 industry submissions following an open call for applications, and the government down-selected 4 presentations for a government audience of 19 attendees from 6 different agencies. Additionally, Dr. Petrock briefed the audience, which included industry, academia, and government representatives, on the Armaments Center's research interests and the capabilities it seeks from collaborators.

## Event Outcomes
