

INNOVATE WITH VATE AFRL

TECH TRANSFER

PURPOSE

Identify new, non-traditional businesses and universities to partner with AFRL/RW

Educate businesses about RW's strategic priorities and technologies of interest

Introduce key players in the AFRL/RW technology transfer ecosystem

HIGHLIGHTS

More than 7 AFRL/RW presenters, including Chief Scientist and Chief Engineer

Sharing of resources that businesses and universities can use to guide them through the procurement process

Post-event networking event for industry to engage with RW personnel

Innovate with AFRL

Doolittle Institute, in collaboration with the Air Force Research Lab Munitions Directorate (AFRL/RW) hosted the first annual "Innovate with AFRL" event to engage with small and non-traditional businesses and universities.

The content of this event was tailored for industry practitioners with limited or no experience working with AFRL/RW and was intended to provide an overview of the technological areas of interest at AFRL/RW as well as the key departments involved in furthering R&D relationships with industry.

Topics covered included: RW Science and Technology priorities, RW Technology Integration Priorities and RW SBIR/STTR Program Overview. The event concluded with an in-person networking session where industry was able to engage one-on-one with RW personnel.

Event Outcomes

- 49 in-person attendees
- 56 virtual attendees
- Numerous ongoing meeting requests from industry for more in-depth discussions.
